1. Introduction
2. Methodology
3. Results
4. Conclusion and Further work

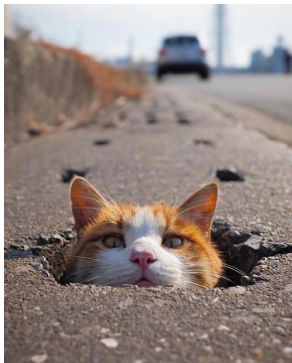

Introduction

A plain simple one

- This is a simple frame.
- It has nothing but just bullet points.

You can also have things without bullet points.

Unusual layout frame

Observations:

- There is a cat.
- It looks like it's stuck in a pot hole.

Figure 1: A picture of a cat in a pot hole¹.

You can also split things into two columns and arrange them as so.

¹A. Alexander, B. McBoatface, *Names made by public vote* 3 (2020), p. 1.

Methodology

How to perform research

Figure 2: Hedgehog posing in a tiny kayak.

- This is a picture of a happy hedgehog.
- You can even cite where this hedgehog is from².

²J. Smith et al., *Beautiful researchese* 1 (2019).

Concurrent vs Information-passing

Figure 3: Gecko strumming a leaf².

- He pulled out his guitar:
- ‘Anyway, here’s Wonderwall.’

Figure 4: Bald eagle over ice³.

- ‘*When will my reflection shows...*’
- ‘*...who I am, inside.*’

³H. Davidson, M. Toyota, *Songs in the 90s* 11 (1990), p. 2.

⁴D. Mulan, *Disney songs in real life* 3 (2020), p. 3.

Results

Computer models and calibration

- Some results here...
- Some results there...
- And happy dancing mantis!

Figure 5: Two mantis on a wig.

Conclusion and Further work

Remarks

- The first goal is working hard.
- The second goal is working a bit harder.
- The most important goal is, however, having fun.
- And you also get called a doctor by the end of it.

Timeline for the project
